Dear EPA,

I am disappointed in the Willamette River cleanup proposal. After 12 years I was hoping that the proposal would address much more. Too much is being left to the river cleaning itself over time. I am hoping that you will provide a better clean-up solution and remove more of the contaminated sediment so that the river will be safer sooner. If we do not do it now it will never happen.

I was so proud to move to Oregon 30+ years ago because of the pristine rivers. Since then the EPA has not been doing their job.

A lot of money and time (12 years) was spent researching and constructing the proposal that really doesn't address the timely or comprehensive clean up of the Willamette River. I as an Oregonian do not accept this proposal.

You need to do more.

Thank you in advance for considering a more comprehensive clean-up plan.
